

REPAIR, DON'T WASTE MANIFESTO

Championing the sustainability and cost-effectiveness of repair over replacement.

Our mission at 'Repair, don't waste' is to make in-house electronics repair the 'norm' for businesses of all sizes. This does not come without challenges; however, our mindset provides incredible benefits and opportunities for industries of all kinds. So why should your company #RepairDontWaste?

1.

REDUCTION OF WASTE AND EMISSIONS

Repair rather than discarding the defective electronic circuit board produces **85% fewer CO2 emissions** (Source Apec).

2.

MACHINE DOWNTIME

Repairing your essential machines in-house provide **fast access to ready-to-use stock** which reduces downtime and operational losses.

3.

CREATES QUALITY TECHNICAL JOBS

Repair technicians and engineers are the future of sustainable industry and will help to establish repair and maintenance as a first resort in the face of electronic problems, rather than a last.

#RepairHeroes

5.

SAVES YOU MONEY

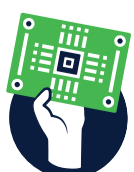

Research indicates that circuit boards that are repaired close to the point of use are **90% cheaper** compared to buying a new replacement.

4.

POTENTIAL FOR INCREASED PCB PERFORMANCE

Modern troubleshooting technologies, training, and international standards ensure that the **repaired equipment performs at least as well as brand-new equipment**.

**REPAIR
DON'T
WASTE**
